

COMMUNITY ACTION MEETING

INVITATION

To All Aboriginal and Torres Strait Islander PLWHIV

Recent research by the Kirby Institute (July 2019) showed that Australia recorded the lowest number of HIV diagnoses among gay and bisexual men. Since 2001, detection rates among our mob have gone up, particularly in Aboriginal and Torres Strait Islander women / IV drug users!!!

You are invited to a private and informal gathering to come together as mob and discuss new approaches to HIV sexual health awareness, education and advocacy, that is peer-led, self-determined and driven by us for our community.

Community members, Elders, Workers, Students, Young People and members of the LGBTQ community are welcome to attend. Your voice, your experience and your ideas are essential to combatting the rise in HIV detection rates in our mob!

Sunday 28 July 2.00pm
